SUMMARY

Data Analyst Machine Learning enthusiast skilled in Python, SQL, and Power BI. Experienced in building dashboards, performing EDA, and developing predictive models. Passionate about turning data into actionable business insights.

TECHNICAL SKILLS

Languages	Python, SQL
Data Analysis	Pandas, NumPy, EDA)
Visualization	Power BI, Excel
ML	Scikit-learn, Regression, Feature Engineering
Tools	Git, GitHub,DAX

WORK EXPERIENCE

Web Developer Intern — Talent Kite

March 2026 – May 2026

- Improved UI responsiveness by optimizing frontend components
- Enhanced user experience through performance improvements

AI/ML Intern — ICT Academy

Jan 2026 – Feb 2026

- Built predictive models using machine learning techniques
- Performed data preprocessing using Pandas and NumPy

PROJECTS

Car Price Analysis Dashboard (Power BI)

- Built dashboard to analyze pricing trends and KPIs
- Created KPI dashboards and visualizations using DAX functions

Sales Performance Dashboard (Power BI)

- Built a dashboard to monitor sales performance and key business metrics
- Visualized KPIs such as revenue, orders, and category-wise performance

Used Car Price Prediction (Machine Learning)

- Developed a regression model for predicting used car prices
- Conducted exploratory data analysis (EDA), feature engineering, and model evaluation

ACHIEVEMENTS

- 1st Place — FORGE Idea Pitching (College Level)
- 2nd Place — SIH Prelims 2024

EDUCATION

MES College of Engineering

Bachelor of Technology in Computer Science

2023 – 2027

Kuttippuram, Kerala
